BigLever Bridge Partner Program

Companies across a spectrum of industries are discovering the power of Systems and Software Product Line Engineering (PLE) for changing the fundamentals of how they create, evolve, deliver and compete with their product lines. Now, all systems and software engineering tool makers can become part of the PLE ecosystem of consistent, compatible, and fully unified PLE solutions.

With the BigLever Partner Program, you can build PLE bridges for your tools and offer these valuable new PLE extensions to your customers or user communities.

Leverage the power of the Gears PLE Lifecycle Framework.

BigLever's industry-standard Gears PLE Lifecycle Framework provides the technology foundation for making your tools part of the PLE ecosystem. The Bridge Partner Program allows you to connect to the Gears PLE Lifecycle Framework via the new PLE Bridge API, making your tools "product line aware" and ready to be included in the unified PLE solutions used by your customers or user communities.

Access the Gears Bridge SDK.

The Bridge Partner Program gives you access to the Gears Bridge SDK, the companion development kit for the PLE Bridge API. The Gears Bridge SDK provides the complete package of documentation, examples and support materials you need to build and deliver consistent, compatible, validated PLE bridge products. BigLever also provides email and phone support for Bridge Partner developers.

Take advantage of the Bridge Validation process.

BigLever's Bridge Validation process allows you to collaborate with BigLever and demonstrate, through a series of validation steps, that the PLE bridge integration for your tool fully supports the PLE capabilities defined in the Gears Bridge SDK. Your integration will be featured as a Validated Bridge on the BigLever website – and you will be able to display the Validated Bridge logo, to clearly convey to the world that your "product line aware" tool fully supports the industry's best and most successful PLE practices.

Collaborate with BigLever to address the PLE needs of your customers or user communities.

Your Bridge partnership with BigLever isn't just about technology – it's also about understanding and meeting the unique PLE needs of your customers or user communities. As the world leader in PLE, BigLever offers valuable insights and expertise to help you identify and address your users’ PLE challenges through collaborative sales, marketing and consulting.

As a BigLever Bridge Partner, you can become part of the expanding PLE ecosystem and help meet the increasing demand for PLE solutions by creating your own PLE bridges for your tools.

Contact BigLever to learn more about becoming a Bridge Partner.
